

Lead Self Outstanding Questions

NZALC Lead Self redesign · Status 1 October 2026

GATE TO PHASE 3

Blind validation conversations

At least 3 recent recruits and 3 current or recent TAD Section Commanders, testing whether a Corporal can sustain the system (ST-4) and whether recruits keep using it after Day 2 (ST-5). Everything below informs later design decisions. None of it blocks Phase 3.

01 FOR TAD

Partly answered by the validation conversations where marked.

Ref	Question	Needed before
O1	The TAD programme: Ex One and Ex Two timing, march-out, and existing moments where a checkpoint or a Section Commander question could fit (end-of-day briefs, AARs, the "Rest, Revise, Reflect" routine) Priority Validation	Placing checkpoints and later touchpoints
O2	Are the two Lead Self days back to back, and what else happens in week 1?	Detailed two-day design
O3	Do Section Commanders currently run the post-exercise feedback rounds? Priority Validation	Settling the Section Commander role
O4	Do Section Commanders formally assess their own recruits? Priority Validation	Making feedback feel safe, not like assessment
O5	Section size, Section Commander-to-recruit ratio, and Section Commander turnover during a course Validation	Two-day design (time for one-to-one observation)
O9	Can an existing week-1 activity serve as the Day 2 pressure task, or must NZALC design one?	Detailed Day 2 design

02 FOR NZALC AND ELDA

Inputs NZALC holds or can obtain directly.

Ref	Question	Owner
O6	How long is the Train the Trainer (T3) package with Section Commanders, and can it change?	NZALC / TAD
O8	Are DEB/DESC, Keep/Stop/Start, systematic self-reflection, the Value Add Review and the hot-seat feedback round standard tools across the Leadership Development System?	ELDA / Tony
O11	Combat Mindset terminology; the PUP Workbook (defines Red Head–Blue Head and details Prepare–Perform–Recover); a source for WIN, if wanted	Combat Mindset Framework programme / NZALC

03 FOR OTHER OWNERS

Needed before evidence design and page design.

Ref	Question	Owner	Needed before
O7	Is Learning Outcome 1.3 evidenced by the Day 2 first priority, the post-Ex One LDP, or later? Who assesses it?	Training design / COG 1 owner	Settling how evidence is used
O10	Sign-off on the mental-health pathway; cultural review of the Tōtara story and te reo content	Army Psychology Services; cultural adviser	Writing workbook pages

04 OPEN PRODUCT DECISIONS

NZALC's to make, once the inputs above arrive.

B1 Part 2 format

No option preferred. Waits on validation: what recruits actually carry and can reach.

B6 Feedback vs assessment

Can the same evidence serve both without making feedback less honest? Waits on O4 and O7.

B2–5 Supporting decisions

Separate peer feedback sheets; privacy rules; T3 scope; Section Commander job aid. Provisional; none blocks anything.

ASK FIRST

O1, O3 and O4

If only a few questions can go to TAD first, these three shape the Section Commander role more than anything else.
