

OUTSTANDING QUESTIONS

GATE TO PHASE 3 Blind validation conversations with at least 3 recent recruits and 3 current or recent TAD Section Commanders, testing whether a Corporal can sustain the system (ST-4) and whether recruits will keep using it after Day 2 (ST-5). Everything below informs later design decisions; none of it blocks Phase 3.

FOR TAD

	QUESTION	NEEDED BEFORE
01	The TAD programme: Ex One and Ex Two timing, march-out, and existing moments where a checkpoint or a Section Commander question could fit (end-of-day briefs, AARs, the "Rest, Revise, Reflect" routine) PRIORITY PARTLY VIA VALIDATION	Placing checkpoints and later touchpoints
02	Are the two Lead Self days back to back, and what else happens in week 1?	Detailed two-day design
03	Do Section Commanders currently run the post-exercise feedback rounds? PRIORITY PARTLY VIA VALIDATION	Settling the Section Commander role
04	Do Section Commanders formally assess their own recruits? PRIORITY PARTLY VIA VALIDATION	Making feedback feel safe, not like assessment
05	Section size, Section Commander-to-recruit ratio, and Section Commander turnover during a course PARTLY VIA VALIDATION	Two-day design (time for one-to-one observation)
09	Can an existing week-1 activity serve as the Day 2 pressure task, or must NZALC design one?	Detailed Day 2 design

FOR NZALC AND ELDA

	QUESTION	OWNER
06	How long is the Train the Trainer (T3) package with Section Commanders, and can it change?	NZALC / TAD
08	Are DEB/DESC, Keep/Stop/Start, systematic self-reflection, the Value Add Review and the hot-seat feedback round standard tools across the Leadership Development System?	ELDA / Tony
011	Combat Mindset terminology; the PUP Workbook (defines Red Head–Blue Head and details Prepare–Perform–Recover); a source for WIN, if wanted	Combat Mindset Framework programme / NZALC

FOR OTHER OWNERS

	QUESTION	OWNER	NEEDED BEFORE
07	Is Learning Outcome 1.3 evidenced by the Day 2 first priority, the post-Ex One LDP, or later? Who assesses it?	Training design / COG 1 owner	Settling how evidence is used
010	Sign-off on the mental-health pathway; cultural review of the Tōtara story and te reo content	Army Psychology Services; cultural adviser	Writing workbook pages

OPEN PRODUCT DECISIONS (NZALC)

	DECISION	WAITING ON
B1	Physical format of Part 2 (no option preferred)	Validation: what recruits actually carry
B6	Whether the same evidence can serve both developmental feedback and formal assessment	O4 and O7
B2–B5	Peer feedback sheets kept separate from the workbook; privacy rules; scope of the T3 package; one-page Section Commander job aid. Provisional recommendations exist; none blocks anything	—

If only a few questions can go to TAD first: **01, 03, 04**. They shape the Section Commander role more than anything else.
